

The Digestive System

Solve the clue sets to complete the crossword. The grey squares are the spaces between words in two-word answers.

Inside the stomach, **11 down** is added to kill germs. Also, an **27 across** called protease, which breaks down protein molecules. The resulting squidged up food is called **9 across**. This is released into the top of the **12 down** intestine. Green-coloured **26 down** is added to help fats mix with water. This was stored in the bag-like **13 down**.

When the rest of the answers are in place, work out where these words fit. Write your own short clue for each one.

TONGUE	

1 across — the tube that goes from the back of your mouth to your stomach

19 across — it's 1.5m long, where the water is absorbed

2 down — they make saliva inside your mouth

10 down — the first part of the small intestine where enzymes are added

18 down — all the goodness you absorb from the food: like vitamins, sugars & amino acids from proteins

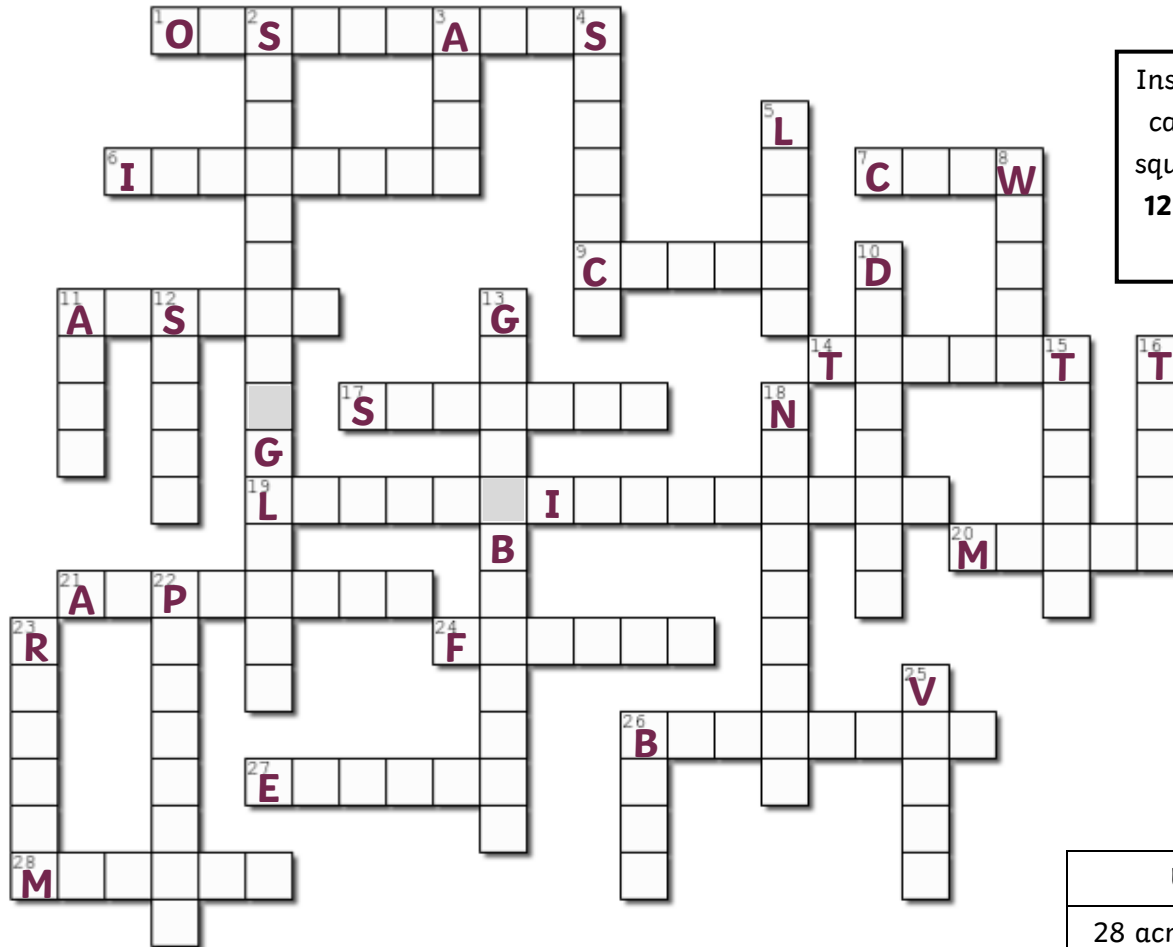

22 down — organ near your liver that makes several different enzymes

Unscramble	
28 across	A L M O R S
4 down	A C H M O S T
5 down	V I L R E
16 down	E T H T E
23 down	C E M R U T
25 down	L I V I L

Crack the code: each number is a letter
