

The Digestive System

Fractions and units of measurement

The large intestine is $1\frac{1}{2}$ m long.

Write $1\frac{1}{2}$ as a decimal

Write $1\frac{1}{2}$ in words

How many cm are there in $1\frac{1}{2}$ m?

How many $\frac{1}{2}$ s are there in $1\frac{1}{2}$?

If the waste food is $\frac{1}{2}$ way along the large intestine, how many cm has it still got to go?

The Digestive System

Times Tables

The small intestine is 6m long. There are 6 villi in each piece drawn here. Use your 6x table to work out how many villi there are in the pictures.

The Digestive System

Maths ANSWERS

$1\frac{1}{2} = 1.5 = \text{one and a half} = 150\text{cm}$

There are 3 halves in $1\frac{1}{2}$

The waste food has 75cm still to go

$$1 \times 6 = 6$$

$$3 \times 6 = 18$$

$$5 \times 6 = 30$$

$$4 \times 6 = 24$$

$$7 \times 6 = 42$$
